

Jacoti launches ListenApp in the App store

NEWS · July 3rd, 2012

The main goal for [Jacoti ListenApp](#) is to bring state-of-the-art Hearing Loss compensation technology to mild and moderate hearing-impaired individuals throughout the world for a fraction of the price of a standard audiphones using mobile health technology and web based health-care services.

[Jacoti ListenApp](#) is a mobile application that uses the default earphones and microphones of the device for providing a calibrated hearing response. The patient can himself fit [Jacoti ListenApp](#) based on the audiogram measured by his/her own certified audiologist. Additionally, [Jacoti ListenApp](#) provides certified audiologists access to [Jacoti's](#) web-based remote fitting platform that allows configuring [Jacoti ListenApp](#) remotely.

- **Affordable:** [Jacoti ListenApp](#) runs on off-the-shelf devices, thus allowing its cost to be a fraction of traditional hearing aids.
- **Serviceable:** [Jacoti ListenApp](#) runs on off-the-shelf devices that are easily replaceable.
- Additionally, as a software based solution, it can be upgraded seamlessly over the Internet.
- **Usable:** [Jacoti ListenApp](#) is designed for simplicity so even inexperienced users can easily set it up and use it.

In addition to taking the patient's individual hearing difficulties into account, [Jacoti ListenApp](#) provides specific so-called listening modes, which allows the patient to configure [ListenApp](#) as Hearing Aid which focuses on speech understanding, or as a Music Player, which focuses on music enjoyment.
